

Data Warehouse Scenario 4: Labor Charges in Cost Center

Problem A line manager for cost center 8P0300 would like to know to which program codes/cost accounts/work packages the members of her organization (or just one individual) have been charging.

Solution Run a Standard Report by clicking on the *Standard Reports* icon (refer to Scenario 1). The *Standard* screen displays. Under *Report Name*, click on *Account Dist by Employees*. Set up a new set of parameters for your report (refer to Scenario 3). Once the new parameter file has been created and named, click on the *Run* button on the *Standard* screen and the report will be generated.
